

MODERN EPOXY

With 20+ years of experience in the flooring business,
we've got you covered.

We specialize in creating stunning epoxy flooring solutions for various environments. Whether it's colorful flooring in your garage, sleek white finishes for office and hospital spaces, or clear epoxy for visually appealing 3D effects, we ensure a perfectly level and enduring surface tailored to your needs.

Epoxy Garage Flooring

Marble and Stone Design Flooring

Epoxy Hospital Flooring

Driveway Sealing and Painting

Laminate & Vinyl Flooring

Custom Kitchen Countertops and Tables

Our premium epoxy flooring systems create an impenetrable, seamless barrier that protects your concrete while completely transforming the look of your space.

HIGH GLOSS EPOXY

For a sleek, modern, and reflective look, our high-gloss system mirrors light to brighten up any room. This seamless, mirror-like finish offers a striking, high-end aesthetic.

A premium epoxy floor is only as good as the preparation underneath it. We don't just "paint" your concrete; we mechanically engineer a bond that ensures your floor will never peel, bubble, or delaminate. Here is exactly what goes into our professional, multi-step installation process:

Diamond Grinding: This process completely removes old sealers, paint, oil stains, and weak laitance (the brittle top layer of concrete).

Crack & Joint Repair: We use specialized, high-strength polyurea or epoxy menders to fill in all deep cracks, pits, and spalls.

Primer: We apply a thick, self-leveling base layer blended with premium liquid pigments, ensuring an absolutely uniform color depth across the entire layout without roller marks or thin spots.

Design: This final layer determines your chosen aesthetic—whether it's a brilliant, light-reflecting High-Gloss, a sophisticated light-diffusing Matte, or a slip-resistant textured coat for our Flake System.

THE BEST IN THE BUSINESS

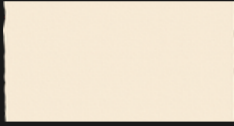

A chemical-resistant, tire-mark-resistant, and entirely waterproof shield that handles everything from heavy foot traffic and vehicle weight to harsh chemical spills.
